FOREWORD

Basic to any decision-making or planning is the need for statistical information. The 1968 edition of "Statistics on Public Institutions for Delinquent Children" is presented in the hope that the information it provides will be of value to professionals striving to help the Nation's young people.

Due to a Departmental reorganization involving the Children's Bureau which, in the past, had issued this publication, the Office of Juvenile Delinquency and Youth Development has assumed the publication task for this year. This, regrettably, accounts for the delay in furnishing the 1968 statistics.

ROBERT J. GEMIGNANI

Director

Office of Juvenile Delinquency and
Youth Development

CONTENTS

	page
SUMMARY	1
TABLES	
1. Number of public institutions for delinquent children, by type and auspices of institution, by State, 1968.....	4
2. Number and percent distribution of children in public training schools for delinquent children, by sex and by State, June 30, 1968.....	5
3. Movement of population in public training schools for delinquent children, by State, year ending June 30, 1968.....	6
4. Capacity of public training schools for delinquent children, by State, 1968.	8
5. Occupancy of public training schools for delinquent children, by State, 1968	9
6. Average length of stay in public institutions for delinquent children, by type of institution, 1968.....	10
7. Average length of stay in public training schools for delinquent children, by State, 1968	11
8. Number of full- and part-time personnel and number of vacancies in public training schools for delinquent children, June 30, 1968, and personnel turnover during year ending June 30, 1968, by State.....	12
9. Expenditures of public training schools for delinquent children, by type of expenditure, average daily child population, and per capita operating expenditures, by State, year ending June 30, 1968.....	13

STATISTICS on PUBLIC INSTITUTIONS for DELINQUENT CHILDREN 1968

SUMMARY

CHILDREN IN INSTITUTIONS

Approximately 54,000 children were living in public institutions for delinquent children in the United States on June 30, 1968--an increase of 2 percent over 1967. Of this number, 45,200 were in training schools, 4,815 in forestry camps and ranches, and 3,720 in reception and diagnostic centers. The rate of children in these institutions in 1968 (number per 100,000 children aged 10 through 17 in the United States population) was 172, as compared to 170 in 1967.

In 1968, boys comprised 79 percent of all children served by training schools, 65 percent of those served by reception and diagnostic centers, and 99 percent of those served by forestry camps.

As compared to the June 30 count of 54,000 children, approximately 131,000 children were admitted to public institutions for delinquent children during the year 1968, and nearly the same number were discharged.

Of the admissions, approximately 81,000 were to public training schools. Of these, 40,000 were first commitments, 4,000 were recommitments, 12,000 were returns from aftercare or parole, 15,000 were transfers from other institutions, and 10,000 were "other admissions." Of the approximately 81,000 discharges from training schools in 1968, 53,000 were placements in aftercare or parole, 6,000 were discharges with no agency's supervision, 9,000 were transfers to another institution, and 13,000 were "other discharges."

Approximately 40,000 children were admitted to reception and diagnostic centers in 1967. Of these, 11,000 were first commitments, 1,000 were recommitments, 4,000 were returns from aftercare or parole, 1,000 were transfers from other institutions, and 23,000 were "other admissions." Of the 40,000 discharges from reception and diagnostic centers, 15,000 were transfers to other institutions, 4,000 were placements in aftercare or parole, 5,000 were discharges with no other agency's supervision, and 16,000 were "other discharges."

Approximately 10,000 children were admitted to forestry camps and ranches in 1968. Of these, 6,000 were first commitments, 500 were recommitments, 200 were returns from aftercare or parole, 3,000 were transfers from other institutions, and 500 were "other admissions." Of the 10,000 discharges, 6,500 were placements in aftercare or parole, 2,000 were transfers to other institutions, 500 were discharges with no other agency's supervision, and 1,000 were "other discharges."

In 1968, 55 percent of the public institutions for delinquent children had average lengths of stay of 8 months or less, 20 percent of 9 months to 1 year, and 25 percent of 1 year or more. For training schools alone, the average length of stay in 1967 was approximately 10 months. Forestry camps and reception and diagnostic centers had average lengths of stay of 6 months and 3 months, respectively.

THE INSTITUTIONS: NUMBER, CAPACITY, OCCUPANCY PERSONNEL, EXPENDITURES

There were 322 known public institutions for delinquent children in the United States in 1968. Of these, 229 were training schools, 13 were reception and diagnostic centers, and 80 were forestry camps. Two hundred ninety-four of the 322 institutions returned reports to the Children's Bureau covering the information requested.

Of the 205 training schools reporting in 1968, 87 (42 percent) had capacities of less than 150 children¹, and 118 (58 percent), of 150 or more. Of this latter group, 47 had capacities of 300 or more children. Of the 76 forestry camps reporting, 27 had capacities of less than 50 children, 44 of 50-99 children, and 5 of 100-149 children. Of the 13 reception and diagnostic centers, 5 had capacities of under 100, 2 of 100-199, and 6 of 200 or more children.

Of the 294 institutions reporting, 103 (35 percent) were housing more children than their stated capacities. Seventy-three of the training schools (36 percent), 25 of the forestry camps (33 percent), and 5 of the reception and diagnostic centers (38 percent) reported being "overcrowded" in 1968.

In 1968, there were an estimated 27,000 full-time employees in public institutions for delinquent children--an increase of about 8 percent over 1967. Most of these employees were involved in the treatment or education of children. Vacant positions in 1968 numbered about 2,500.

Of all full-time employees, training schools employed about 23,000, forestry camps 1,800, and reception and diagnostic centers 2,100.

¹ The Children's Bureau has recommended this number as the maximum acceptable capacity for training schools.

In 1968, there were approximately 2.0 children for every full-time employee in public institutions for delinquent children. Reception and diagnostic centers had the lowest child-employees ratio 1.8, followed by training schools 2.0 and forestry camps 2.7.

An estimated \$227.2 million was spent by public institutions serving delinquent children in 1968--a 9 percent increase over 1967. Of the total expended, 93 percent went for current operations and 7 percent for capital improvements. For training schools alone, total expenditures in 1968 amounted to \$190.8 million. Reception and diagnostic centers and forestry camps and ranches expended \$15.7 million and \$20.7 million, respectively.

The per capita operating expenditure for all public institutions in 1968 was \$4,516 as compared to \$3,896 in 1967.² For training schools alone, the per capita operating expenditure was \$4,368 as compared to \$3,815 in 1967.

² The per capita expenditure was computed by dividing the total operating expenditures of institutions by the average daily child population.
